

## CLAIMS

Clean version of claims 2, 24 and 30.

Sub E-1  
2. A toy comprising:

a security alarm system comprising a controller and having an armed state and an unarmed state, the controller being responsive to a signal input to at least one input thereof to cause the security alarm system for said toy to selectively assume the armed and unarmed states;

a signaling device coupled to the controller and responsive to provide an audio or visual alarm signal;

Sub E-2  
24. A toy comprising:

a security alarm system for a toy comprising a controller activation of an alarm, the security alarm having an armed state and an unarmed state, the controller being responsive to a signal provided to at least one input of the controller to cause the security alarm device for said toy to selectively assume the armed and unarmed states;

a signaling device coupled to the controller and responsive to provide at least one first audio or visual alarm signal representing a change in state of the security alarm device.

the controller causing the signaling device to provide the at least one first audio or visual alarm signal with a change in the state of the security alarm system between the armed state and to provide that at least one second audio or visual alarm signal when the alarm is activated.

Sub E-3  
30. A toy comprising:

a security alarm system for a toy comprising a controller and having an armed and unarmed state, the controller being responsive to at least one input thereof to cause the security alarm device for said toy to selectively assume the armed and unarmed device.

the controller causing the signaling device to provide an alarm signal with a change of state of the security alarm system between its arm state and unarmed state;

a propulsion system including an electronic motor which propels the toy and a motor drive which selectively supplies power to the electronic motor, the controller being coupled to the motor drive and causing the motor drive to selectively supply or not supply power to the electric motor when the security alarm device is in its armed state.
